Light rain	Cloudy	Light rain showers	Light rain showers	Sunny intervals	Sunny intervals
Precipitation probability					
40%	20%	30%	30%	20%	10%

Forecast for Tuesday 25 May 2021

Weather: Cloudy, damp start then brighter or sunny spells develop this morning however there will be showers over the hills, drier for more easterly ranges. During the afternoon the showers will get less frequent with more in the way of sunshine particularly for more northern ranges. Showers will tend to die out in the evening with a generally bright and clear evening in the hills.

Chance of cloud free mountain/hill tops above 800m: 60% chance, cloud shrouding the munro tops at times especially as showers group together or heavier showers move through the area, more northerly hills will see more in the way of lower cloud.

Visibility: Patches of poor visibility at first with cloud bases around 400m especially in the north around Assynt and Torridon. During the morning the cloud bases will lift and break to be above the summits but will lower once again in any heavier showers or when showers group to give longer spells of rain, then bases will be around 600m temporarily. Further south west around Knoydart and Morar tops will generally be clear. Out with showers this afternoon visibility will be very good with good views likely and showers should be easy to spot approaching.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Feeling very cool again in fresh northerly winds especially in heavier showers with sleet, quite a wintery feel with freezing level around the highest summits in the morning.

Forecast for Wednesday 26 May 2021
Weather: Cloudy overnight with a few showers expected, some areas in the west will likely stay dry overnight. Some sunny spells developing and then a few showers during the morning. These will die out in the afternoon with some bright and sunny conditions likely, a dry and clear night ahead, feeling warmer by the afternoon too.

Maximum wind: Northwesterly 10-15 mph falling very light later.

Chance of cloud free mountain/hill tops above 800m: 80%, tops generally clear but perhaps a few patches of cloud early in the morning and in any heavier showers especially for northern peaks.

Visibility: Generally very good visibility in the northerly airstream but visibility dipping in any heavier showers and if cloud gathers over munro tops for a time.

Temperature: **Glens:** Plus 5 rising to 13 Celsius.
At 800m: Plus 3 rising to 6 Celsius.
Freezing level: Above the summits.
